

REMARKS

Claims 1 to 20 and 22 are in the application. Claims 1 to 20 and 22 have been made the subject of a restriction and species requirement. In the previous response filed on May 20, 2002, the Applicants elected Group I, claims 1-16 and 18-20. According to the examiner, the Applicants did not sufficiently limit the elected claims to a single disclosed species. Therefore, the Examiner requests that the Applicants elect a single disclosed species to which the claims would be restricted if no generic claim is finally held to be allowable and to list all claims readable thereon including those subsequently added.

SPECIES REQUIREMENT UNDER 35 U.S.C. §121

Applicants hereby elect, SEQ ID NO. 1, a specific recombinant substantially full-length mutant allergen, wherein said mutant allergen has a reduced enzymatic activity compared to the wild-type allergen. Applicants further elect a vaccine comprising, SEQ ID NO. 1, a specific recombinant substantially full-length mutant allergen, wherein said mutant allergen has a reduced enzymatic activity compared to the wild-type allergen and an adjuvant, wherein the adjuvant comprises 3-O-deacylated monophosphoryl lipid A.
